

Locking box made of solid anodized aluminum.
Lock in stainless steel with the possibility of having different codes and colors of the keys.
Lock equipped with dust cap.
Key extraction only with the pivoting panel closed.

Technical Data:

Mechanical service life:	min. 5'000 operating cycles
Shock and vibration:	according to IEC 61373
Operating temperature	-25 °C to +70°C
Degrees of protection	IP65
Corrosion resistance	960 hours in a saline atmosphere

Standards:

the device complies with the following standards:

IEC 61373 - Shock and vibration tests

CEI EN 60529 - Degrees of protection provided by enclosures (IP code)

ISO 9227 - Corrosion tests in artificial atmospheres - Salt spray tests
